Proof the Model Works

If you're unsure the Model will work for you, here's an opportunity to hear from students who saw amazing results from the Self Coaching Model. There are so many incredible stories to watch, but here are a few that you can't miss.

SELF WORTH

"I thought I needed someone else to tell me I was worthy of being loved." –Kim Job

Kim grew up in what seemed like a happy family, but she wasn't happy. She spent most of her life over achieving to get the approval of others. As soon as Kim found the Model, she realized that other people don't control her emotions and that her past doesn't define her and she can tell the story of anything that happened in her past however she wants to tell it.

RELATIONSHIPS

"I thought if my mom could just change, I would feel better." –Janet Archer

When her mom was diagnosed with dementia, Janet struggled to accept it. She didn't want this to be her reality. Through the Model, Janet learned that what needed to change was her thoughts about her mom having dementia. Since finding the Model, Janet was able to totally transform her relationship with her mom into something amazing.

WEIGHT LOSS

"I was willing to do whatever it took to be skinny because I thought that's when I would be happy and feel better." –Felicia Broccolo

After she passed out from not eating, Felicia knew something had to change. Instead of being mean to herself, the Model showed her that affirmative thoughts would create positive results. It taught her that she was completely in control of her feelings, her actions, and the results she was getting, including her weight.

CAREER

"Even though I had this skill and I was really good at it, I doubted everything about myself." –Elizabeth Salazar

Elizabeth was completely focused on her business and trying to figure out how to succeed with her own company. She wasn't making money. Then she found the Model, which helped her take control of her results. Elizabeth set a goal to make $100K last year and ended up making $120K.

You can learn this exact model and how to practice it in a way you can implement daily.
