

Where we want to be  
possibilities

We have established  
where we are starting.

Now we need to decide  
where we want to be.

*where to go?*

It is difficult to know  
where to go when  
you don't really  
know the options.

You've only been told a very limited number of options of what is possible.

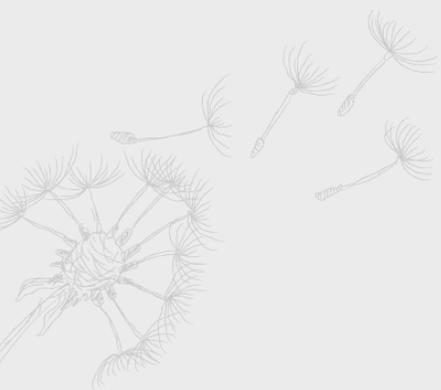

All based on the *past*.

Where would you like to travel?  
**You've never seen a map.**

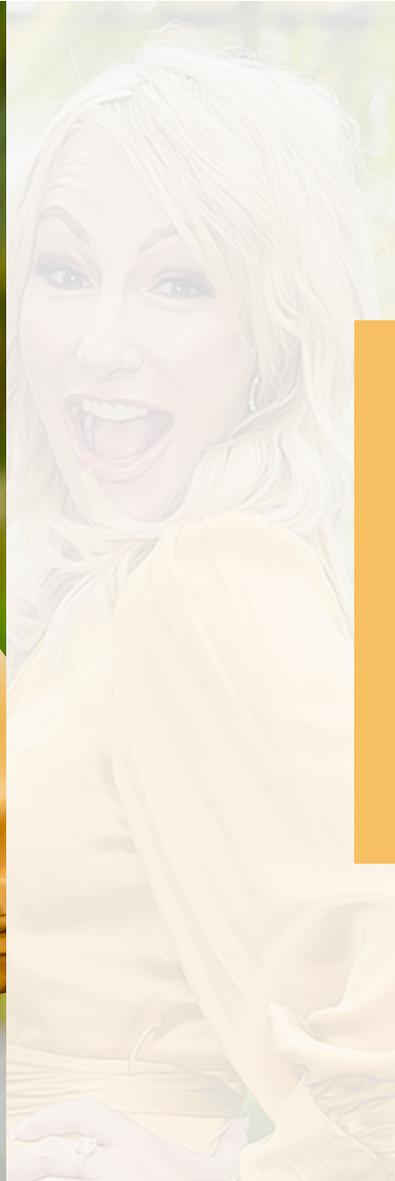

Where does  
*possibility*  
come from?

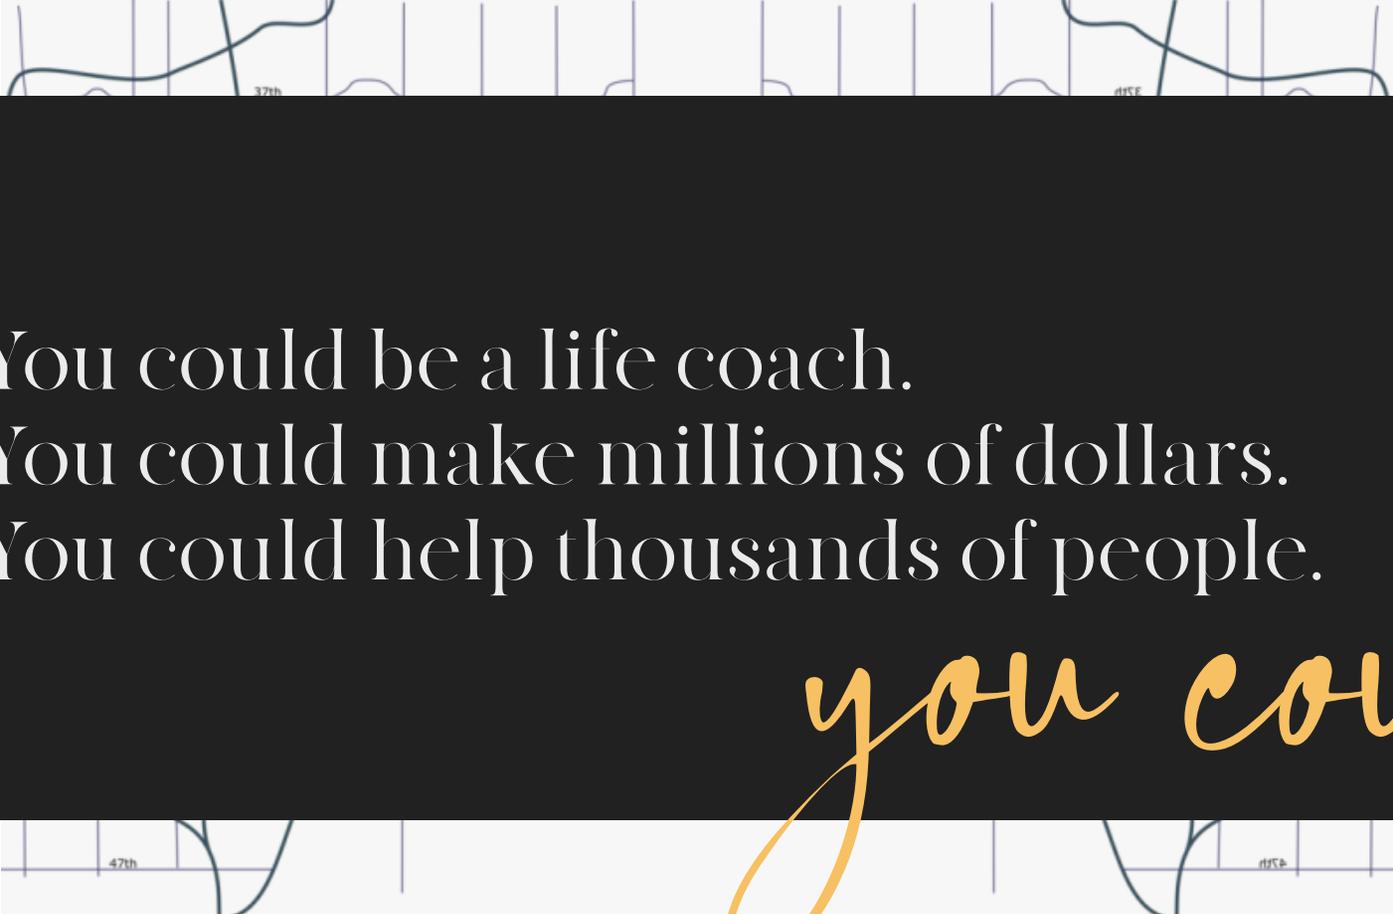

Your past.  
Other people's pasts.  
Or...

*Your Imagination*

It is possible  
you could have  
a life like mine.

The background features a light gray ECG (heart rate) pattern with vertical grid lines and a blue line representing a heartbeat. The pattern is visible at the top and bottom of the page, partially obscured by a large black rectangular area.

You could be a life coach.  
You could make millions of dollars.  
You could help thousands of people.

*you could*

People will disagree.

*Let them.*

Let me tell you the  
story of my first  
Mastermind.

You could have a life  
way beyond my life.

So can I.

We will find that  
possibility in  
our imagination.

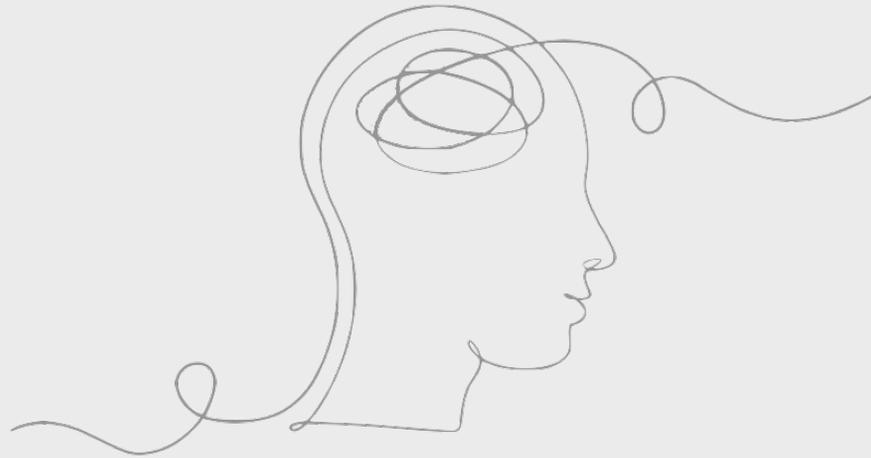

beyond

Think of three people who imagined  
a possibility in their mind..  
something that wasn't possible

*until they imagined it.*

Name a random possibility for yourself  
that only exists in your imagination so far.

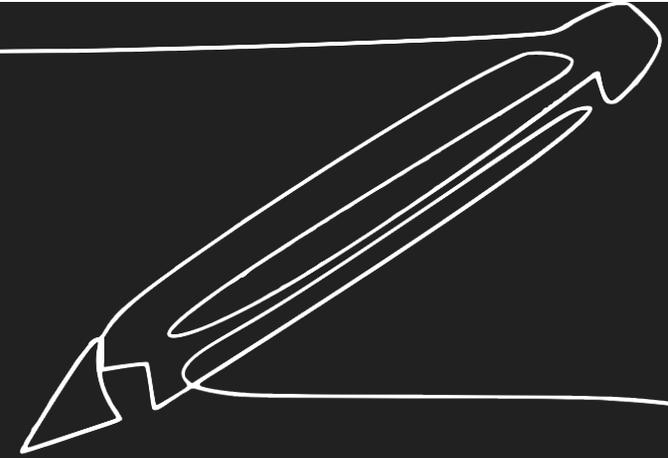

*What is a dream?*

Something that doesn't  
exist in the real world

*yet.*

Do you allow yourself to know your dreams?  
*Why or why not?*

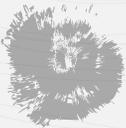

DREAMS SHOULD NEVER BE  
**hidden or hurt us.**

ABILITY

—VS.—

CAPACITY

ca·pac·i·ty

/kə'pəsədē/

The amount  
that someone  
can produce

How will  
you ever  
know your  
capacity?

How many  
people die with  
unused **capacity**?

*capacity*

What if

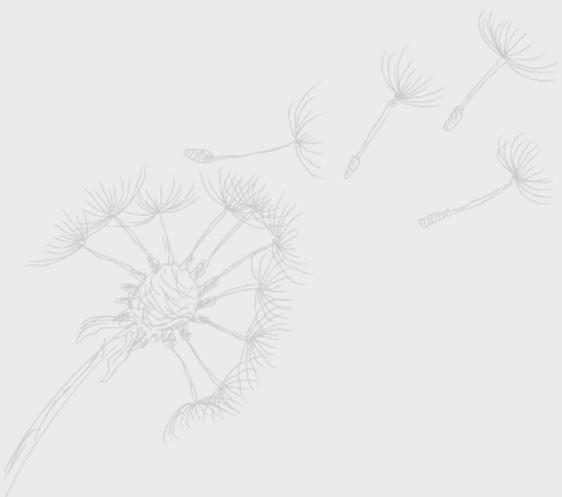

*every human*

was encouraged to utilize their full capacity?

Possibilities can

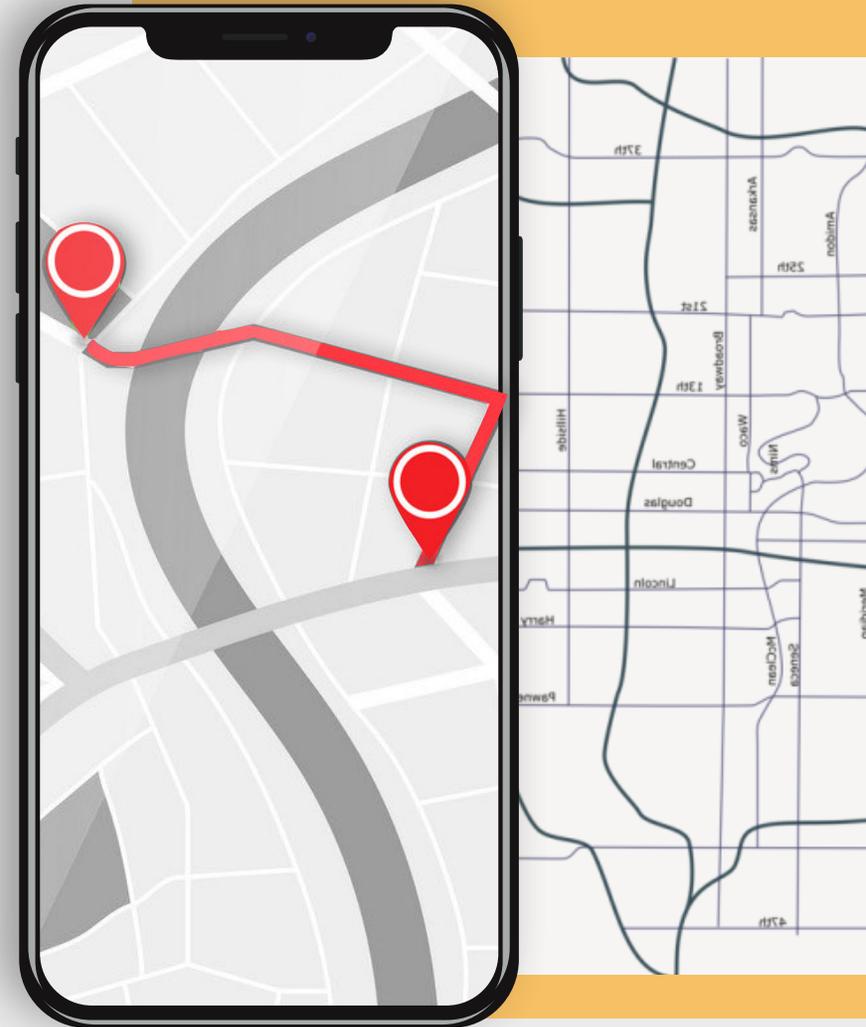

Reveal

capabilities.

# DREAM NAVIGATION

- ① We have to know where we are **starting**.
- ① We have to know the **possibility drop**.
- ① We have to have the **fuel of desire** to get us there.

Desire comes  
from believing in a  
possibility enough  
that it outlasts  
your doubt.

*desire*

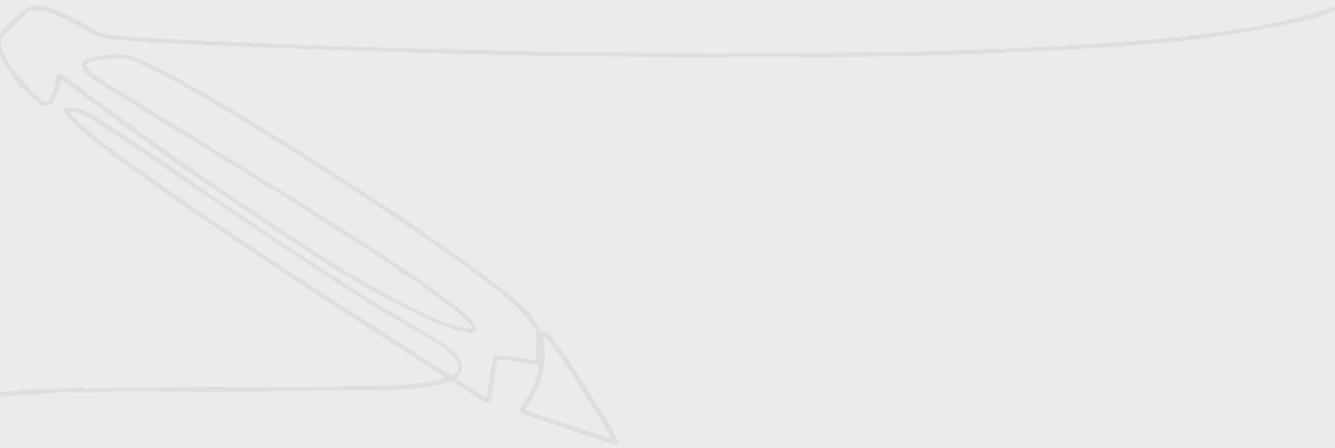

DESIRE

—vs.—

DOUBT

We generate desire with belief sentences.  
We generate doubt with disbelief sentences.

EXCUSES  
DESTROY  
DESIRE

*destroy*

Decisions activate  
desire.

Decisions confirm  
belief.

When you have a possibility drop  
with belief and desire – all you  
have to do is make a decision.
